

# WireFree™ Wall Switches: Radio Technology Somfy

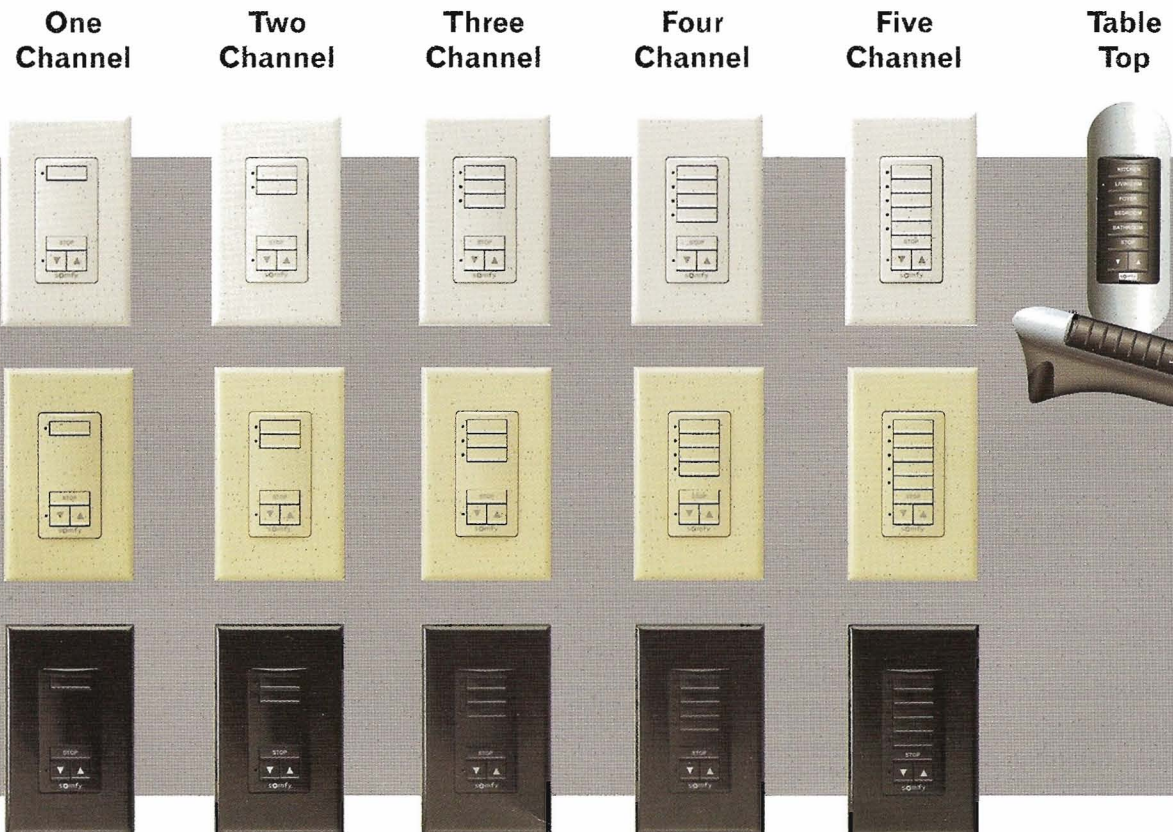

## About the DecoFlex WireFree™ RTS Wall Switch

- Completely wireless, therefore no electrician is needed
- Installs in minutes either independently or next to an existing light switch
- Single and five channel button versions are available completely assembled
- The switch may also be easily converted to a two, three or four channel version by simply selecting the corresponding face plate with the switch.
- Printed channel buttons are available to replace blank channel buttons or those with temporary stick-on labels.

### Single Channel & Multi-Channel Switch Options

- Multiple finishes available to match any décor:
  - Pure finish to match any décor
  - Ivory finish for classic sophistication
  - Black finish for a modern top of the line look
- Compatible with RTS family of motors
- Operates motorized window coverings within a range of 65 ft.

# Product Specifications

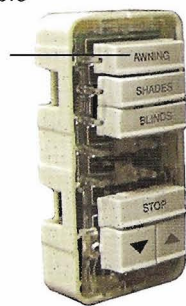

## Customization

These switches are so easy to customize. Simply purchase the face plate that corresponds to the number of channel buttons needed for your project and add or remove buttons. Replace the temporary button labels with printed channel buttons. Choose from 56 different buttons in all three finishes: white, ivory or black.

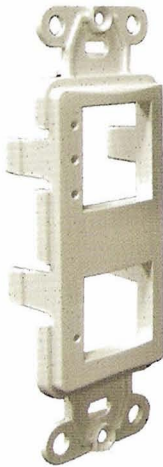

**TIP:** Custom buttons can also be ordered for added personalization. For example: **TOMMY**

# INDIVIDUAL AND GROUP Control:

Combines the functionality of individual control and group control with one product. Motorized window coverings on the same channel can only be controlled as a group and therefore always raise and lower together.

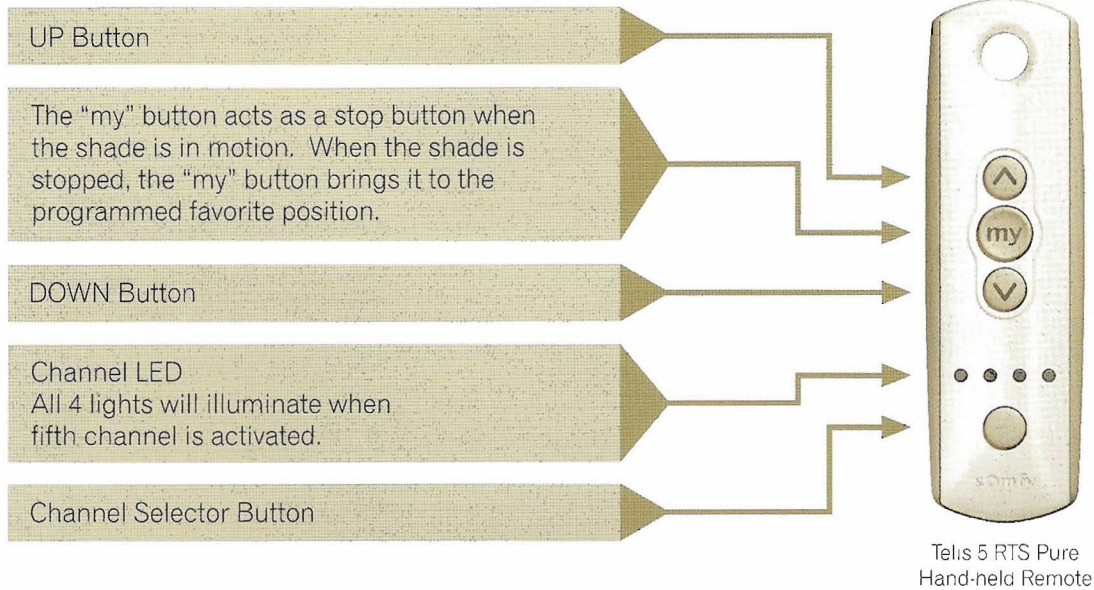

Organization of groups depends on preference: by room, by façade, by application type etc. The number of motorized window coverings assigned to a single channel is unlimited, as long as they are all within the appropriate range of the motorized window coverings, typically 65 ft.

# ENHANCED CONTROL with Radio Technology Somfy® RTS Handheld Remotes and DecoFlex WireFree™ Wall Switches
